

Next Generation of Policy Frameworks and Modeling

WEEK 2 • JUNE 15-19, 2026

DynareJulia and FPAS Mark II:

Forecasting, Scenario Building, and Risk Analysis

DAY 5 • Friday, June 19 — MPR & Communication

From model output to a complete Monetary Policy Report — and transparent Board communication.

Chulalongkorn University • Bangkok, Thailand

Week 2 at a Glance

June 15-19, 2026 — A full policy cycle compressed into five days

DAY 1

Mon · Jun 15

Current Conditions

Data update, weekly briefings, where-is-the-economy-now workflow.

DAY 2

Tue · Jun 16

Market Reference & Case A/B

Scenario construction: market reference, Case A and Case B narratives.

DAY 3

Wed · Jun 17

Taxonomy & Risks

Full taxonomy of scenarios, dark corners, risk assessment.

DAY 4

Thu · Jun 18

Trade-offs & DynareJulia

Policy trade-off analysis and DynareJulia implementation.

DAY 5

Fri · Jun 19

MPR & Communication

Drafting the MPR, Python pipelines, transparency and Board communication.

DAY 5 • FRIDAY, JUNE 19

The communication ecosystem

Four documents, one decision day, three audiences

PRESS RELEASE

Executive MP Statement

Brief, decision-focused summary issued at 12:00 on decision day.

CORE NARRATIVE

Monetary Policy Report

Full analysis of current conditions, scenarios, and taxonomy — released at 18:00.

DATA APPENDIX

MPR Chart Pack

Comprehensive charts and tables supporting the MPR narrative.

BOARD DELIBERATION

Transparency Report

Minutes and individual vote submissions — full Board reasoning in public.

DAY 5 · FRIDAY, JUNE 19

Decision day, minute by minute

The Armenian timetable — GMT+4, same format every quarter

12:00

Policy Decision

Executive MP Statement published simultaneously with the rate decision. Markets react.

14:30

Press Conference

Governor-led press conference, live-streamed. Media questions on rationale, risks, outlook.

18:00

Monetary Policy Report

Full MPR and Transparency Report published — same day, after markets close. Full narrative, full deliberation.

Same-day publication of the MPR and Transparency Report is a deliberate choice — transparency at the moment of greatest market attention.

DAY 5 • FRIDAY, JUNE 19

Inside the Monetary Policy Report

Three sections, each with a distinct job

01

Executive Summary

- Statement by the Board
- Assessment of economic conditions
- Issued as a standalone press release

02

Objectives & Framework

- Statement of Long-Run Monetary Policy Objectives
- Risk management framework
- Definitions of Market Reference, Case A, Case B

03

Monetary Policy Outlook

- Global & domestic economic developments
- Labor market, inflation, financial markets
- Taxonomy of Scenarios (E) + Illustrative scenarios (F)

DAY 5 · FRIDAY, JUNE 19

Transparency Report: Armenia Q1 2026

Published March 17, 2026 — real Board vote, real dissent, real reasoning

THE DECISION

Policy rate unchanged

6.50%

Vote: 5 - 2

Five members voted to keep the rate unchanged, in line with market expectations. Two voted to raise by 25bp, citing Case A-type risks.

INDIVIDUAL VOTES — MARCH 17, 2026

Martin Galstyan	Governor	Keep unchanged
Armen Nurbekyan	Deputy Governor	Keep unchanged
Hovhannes Khachatryan	Deputy Governor	Keep unchanged
Levon Sahakyan	Board Member	Keep unchanged
Armen Ktoyan	Board Member	Keep unchanged
Narek Ghazaryan	Board Member	Increase by 25 bps
Artak Manukyan	Board Member	Increase by 25 bps

DAY 5 • FRIDAY, JUNE 19

AI-Powered reporting pipeline

From DynareJulia output to a consistent, repeatable report in minutes, not days

01

Ingest

Read DynareJulia simulation output and historical data. One schema across all scenarios.

02

Chart pack

Generate every chart in the MPR chart pack with matplotlib or plotly — fan charts, scenario overlays, bar charts.

03

Tables

Build summary tables: key variables, forecast snapshot, revisions from last round, scenario comparison.

04

Assemble

Merge narrative text, charts, and tables into the MPR template. Generate PDF and web versions.

Same pipeline, every quarter — reproducibility isn't optional, it's the product.

DAY 5 • FRIDAY, JUNE 19

Productivity tools that keep economists in control

AI-Powered Learning tools streamline repetitive work — never the analysis itself

WHAT THEY HELP WITH

Repetitive, mechanical work

- Data processing and cleaning pipelines
- Chart and table formatting for consistency across quarters
- Draft translations and cross-language consistency checks
- Report formatting, section linking, and citations
- Internal documentation and version tracking

WHAT THEY NEVER DO

Replace economist judgment

- Decide which scenarios belong in the Taxonomy
- Interpret shock transmission or policy trade-offs
- Write the narrative — that stays economist-led
- Recommend a policy decision or vote
- Operate without transparent, reviewable outputs

Learning Outcomes

By the end of Week 2, participants will be able to:

1

Design scenarios

Construct Market Reference, Case A, and Case B scenarios from a coherent economic narrative.

2

Interpret policy trade-offs

Compare inflation, output, and rate paths across scenarios and identify least-regrets responses.

3

Implement in DynareJulia

Take a scenario from .mod file to simulation output to chart pack with reproducible scripts.

4

Communicate under uncertainty

Draft a structured, policy-ready MPR and support a transparent Board communication process.

DAY 5 • FRIDAY, JUNE 19

Week 2 capstone: a complete MPR for your institution

Each team delivers a policy-ready report by the end of the week

01

**Data & current
conditions**

Day 1

02

**Scenario
construction**

Days 2-3

03

**Quantified
simulations**

Day 4

04

**Draft MPR +
report**

Day 5

Participants leave the week with a full-round deliverable — scenarios, simulations, report — built on an open, reproducible stack.

Great Things are Coming.
